Table of Contents

Preface

The *Informatica Business Glossary Desktop Installation and Configuration Guide* is written for administrators who install the Business Glossary Desktop.

Informatica Resources

Informatica Network

Informatica Network hosts Informatica Global Customer Support, the Informatica Knowledge Base, and other product resources. To access Informatica Network, visit https://network.informatica.com.

As a member, you can:

- Access all of your Informatica resources in one place.
- Search the Knowledge Base for product resources, including documentation, FAQs, and best practices.
- View product availability information.
- Review your support cases.
- Find your local Informatica User Group Network and collaborate with your peers.

Informatica Knowledge Base

Use the Informatica Knowledge Base to search Informatica Network for product resources such as documentation, how-to articles, best practices, and PAMs.

To access the Knowledge Base, visit https://kb.informatica.com. If you have questions, comments, or ideas about the Knowledge Base, contact the Informatica Knowledge Base team at KB_Feedback@informatica.com.

Informatica Documentation

To get the latest documentation for your product, browse the Informatica Knowledge Base at https://kb.informatica.com/_layouts/ProductDocumentation/Page/ProductDocumentSearch.aspx.

If you have questions, comments, or ideas about this documentation, contact the Informatica Documentation team through email at infa_documentation@informatica.com.

Informatica Product Availability Matrixes

Product Availability Matrixes (PAMs) indicate the versions of operating systems, databases, and other types of data sources and targets that a product release supports. If you are an Informatica Network member, you can access PAMs at https://network.informatica.com/community/informatica-network/product-availability-matrices.

Informatica Velocity

Informatica Velocity is a collection of tips and best practices developed by Informatica Professional Services. Developed from the real-world experience of hundreds of data management projects, Informatica Velocity represents the collective knowledge of our consultants who have worked with organizations from around the world to plan, develop, deploy, and maintain successful data management solutions.

If you are an Informatica Network member, you can access Informatica Velocity resources at http://velocity.informatica.com.

If you have questions, comments, or ideas about Informatica Velocity, contact Informatica Professional Services at ips@informatica.com.

Informatica Marketplace

The Informatica Marketplace is a forum where you can find solutions that augment, extend, or enhance your Informatica implementations. By leveraging any of the hundreds of solutions from Informatica developers and partners, you can improve your productivity and speed up time to implementation on your projects. You can access Informatica Marketplace at https://marketplace.informatica.com.

Informatica Global Customer Support

You can contact a Global Support Center by telephone or through Online Support on Informatica Network.

To find your local Informatica Global Customer Support telephone number, visit the Informatica website at the following link: http://www.informatica.com/us/services-and-training/support-services/global-support-centers.

If you are an Informatica Network member, you can use Online Support at http://network.informatica.com.

Business Glossary Desktop Installation and Configuration

This chapter includes the following topics:

Business Glossary Desktop Installation and Configuration Overview

You can install the Business Glossary Desktop in silent mode or in graphical mode. Install the Business Glossary Desktop in silent mode for all business users in an organization. You may also request that business users download and install the Business Glossary Desktop in graphical mode.

The Business Glossary Desktop connects to the Analyst Service which interacts with the Model Repository Service. The Model repository hosts business glossaries.

When you install the Business Glossary Desktop on Windows, it becomes available as a client on the Windows desktop menu. When you install the Business Glossary Desktop on Mac, it appears as a client on the Mac menu system after you start the program using Terminal.

You can also provide business users a location to download the Business Glossary Desktop. You can tell users how to configure preferences, hotkey, and server settings for the client.

Silent Installation

Install the Business Glossary Desktop in silent mode and configure the preferences, hotkey, and server settings during installation.

You can use the properties file to pass arguments to specify server settings for install in silent mode.

Silent Installation Arguments

When you install the Business Glossary Desktop in silent mode, you must pass arguments to specify the server settings for the business glossary client.

The following list describes the silent installation arguments:

USER_INSTALL_DIR

Location to install the Business Glossary Desktop.

PROTOCOL_TYPE

HTTP or HTTPS protocol.

HOST_NAME

Host name of the machine on which the Analyst Service runs.

PORT_NUMBER

Port number of the machine on which the Analyst Service runs.

DOMAIN_USERNAME

User name of the Analyst tool user.

DOMAIN_PASSWD

Password of the Analyst tool user.

DOMAIN_NAME

LDAP or Native security domain of the user.

RUN_ON_STARTUP

Runs the Business Glossary Desktop when the system starts. Specify true to enable this option. Specify False to disable this option.

The default option is False.

SHOW_WELCOME_SCREEN

Shows welcome screen on starting the Business Glossary Desktop. Specify true to enable this option. Specify False to disable this option.

The default option is False.

DO_HIGHLIGHT_SEARCH_TERMS

Enables highlighting of the search criteria in the search result. Specify True to enable this option. Specify False to disable this option.

The default option is False.

SHOW_INACTIVE_TERMS

Shows inactive business terms in the search results. Specify True to enable this option. Specify False to disable this option.

The default option is False.

ENABLE_HOTKEYS

Enables keyboard shortcut to launch the Business Glossary Desktop. Specify True to enable this option. Specify False to disable this option.

The default option is False.

Note: Select two modifier keys and an alphanumeric key when you enable keyboard shortcut.

SELECTION_CONTROL

Selects **Ctrl** as a modifier key. Specify True to enable this option. Specify False to disable this option.

The default option is False.

SELECTION_SHIFT

Selects **Shift** as a modifier key. Specify True to enable this option. Specify False to disable this option.

The default option is False.

SELCTION_ALT

Selects **Alt** as a modifier key. Specify True to enable this option. Specify False to disable this option.

The default option is False.

ALPHABET_HOTKEY

Selects **D** as an alphanumeric value. Specify an alphanumeric value to change the default value.

The default is ALPHABET_HOTKEY=D.

Installing Business Glossary Desktop in Silent Mode on Windows

To install the Business Glossary Desktop without user interaction, install in silent mode by using the properties file that contains the silent installation arguments. The Business Glossary Desktop menu appears in the Windows system menu after installation.

1. Go to the directory that contains the Business Glossary Desktop installation files.
2. Use a text editor to open and specify the values for the parameters in the `SilentInput.properties` file.
3. Save the `SilentInput.properties` file.
4. Run the `silentInstall.bat` file.

Installing Business Glossary Desktop in Silent Mode on Mac

To install the Business Glossary Desktop without user interaction in silent mode on Mac. Open the `silentInput.properties` file and edit the silent installation arguments to install Business Glossary Desktop in silent mode.

1. Go to the directory that contains the Business Glossary Desktop installation files.
2. Open the `silentInput.properties` file using a text editor.
3. Edit the silent installation arguments in the properties file, and then save the `silentInput.properties` file.
4. Open the Terminal as an administrator with the required permissions and run the `silentInstall.sh` file.

Installing Business Glossary Desktop in Graphical Mode on Windows

As an administrator, you can install the Business Glossary Desktop client yourself, or ask business users to download the installation file from a specific location and ask them to install it.

1. Extract the `Informatica_BusinessGlossaryDesktop_Win` file.

2. Run the `Install.bat` windows batch file.

   The **Informatica Business Glossary Setup** window appears.

3. Click **Next.**

4. Select the default folder or click **Change** to select another location to download the file and click **OK**.

5. Click **Next**.

   The **Pre-installation Summary** window appears.

6. Click **Install.**

   The **Server Configuration Panel** window appears.

7. Enter the server configuration settings.

8. Optionally, enable the **Kerberos Domain** if you are connecting to a Kerberos domain.

9. Optionally, click **Get Domain List** to retrieve a list of LDAP domains.

   Select the LDAP domain from the list.

10. Click **Next.**

    The **Post-installation Summary** window appears.

11. Click **Done.**

Installing Business Glossary Desktop in Graphical Mode on Mac

As an administrator, you can install the Business Glossary Desktop client yourself, or ask business users to download the installation file from a specific location and ask them to install it.

1. Extract the `Informatica_BusinessGlossaryDesktop_Mac` file.

2. Open the Terminal and run the `Install.sh` file.

   The **Informatica Business Glossary Setup** window appears.

3. Click **Next.**

4. Select the default folder or click **Change** to select another location to download the file and click **OK**.

5. Click **Next**.

   The **Pre-installation Summary** window appears.

6. Click **Install.**

   The **Server Configuration Panel** window appears.

7. Enter the server configuration settings.

8. Optionally, enable the **Kerberos Domain** if you are connecting to a Kerberos domain.

9. Optionally, click **Get Domain List** to retrieve a list of LDAP domains.

   Select the LDAP domain from the list.

10. Click **Next.**

    The **Post-installation Summary** window appears.

11. Click **Done.**

Server Settings

Configure server settings to enable the Business Glossary Desktop Client to reference the business glossary on a machine that hosts the Analyst Service. Business Glossary Desktop supports Kerberos authentication.

You can enter the following server settings:

Protocol

HTTP or HTTPS protocol.

Host

Host name of the machine on which the Analyst Service runs.

Port

Port number of the machine on which the Analyst Service runs.

Kerberos Domain

Enable this option to connect to the Kerberos domain.

Domain

Select the LDAP or Native security domain of the user from the list.

Username

User name of the Analyst tool user.

Password

Password of the Analyst tool user.
